Summary

Experienced Software Engineer with 15+ years of success in designing, developing, and optimizing enterprise data solutions across telecom, digital analytics, and energy sectors. Adept in building robust ETL/ELT pipelines, data platforms, and backend services using Oracle, SQL, and cloud technologies. Skilled in data integration, modeling and delivering high-quality data pipelines in agile environments. Eager to bring technical depth and leadership to modern cloud-native data architectures

Technical Skills	
	• ETL/ELT Tools (Oracle ODI)
	• Oracle PL/SQL
	• Web technologies (HTML, CSS, JavaScript, jQuery),
	• Microsoft .NET (ASP.NET Web Forms & MVC, C#, VB.NET, Entity Framework),
	• Java SE,
	• Oracle Application Express (APEX)
	• Git, Subversion
	• Object Oriented Design,
	• Database Design,
	• Scrum.

Working Experience

Jan 2020 until Present - Baresquare, Thessaloniki - Greece

Senior Digital Analytics Specialist

My primary duties include:

- Providing consultancy services to clients and implementing solutions across various areas such as Digital Analytics, Consent Management, AdTech Platforms, A/B testing, and Customer Surveys.

- Overseeing extensive analytics projects for enterprise-level clients utilizing tools like Adobe Analytics, Google Analytics, and Tealium iQ.

- Assisting global marketing teams with digital campaigns and data collection initiatives to ensure the precision and reliability of data.

- Mentored junior engineers and contributed to the development of internal best practices for digital data engineering.

Technologies

Vanilla JavaScript, Adobe Analytics, Google Analytics, Tealium iQ

Jul 2007 until Jan 2020 - IBM Greece, Athens - Greece

Advisory IT Specialist

- Led teams in creating enterprise data warehouse solutions, including data integration flows (ETL/ELT) using Oracle ODI, automated testing, and user acceptance testing processes.
- Designed and developed web applications by using Oracle PL/SQL, ASP.NET, and UNIX scripting for telecom and data management, enabling efficient configuration and reporting of network performance and infrastructure.
- Mentored and coordinated global delivery teams, fostering collaboration and ensuring timely project delivery.

Technologies

Oracle Data Integrator (ODI), Oracle Application Express (APEX), Oracle PL/SQL, Subversion, ASP.NET Web forms (C# and VB.NET), CSS, JavaScript, UNIX shell script,

---

Feb 2009 until Sep 2014 – The Rope Effect LTD

Software Architect

Senior Software Engineer for the development of Teretron, a software application for Structural Timber Design to Eurocode 5. Main responsibilities include:

- Implementation of scientific algorithms
- UI design and development
- Database handling
- Technical reporting
- Liaising with structural engineers.

Technologies

Java 7 Standard Edition, Apache Ant, Git

Feb 2007 until Jul 2007 – Vodafone GR, Athens - Greece

Software Engineer

Member of the Network Database team. I worked in the design and development of telecom applications.

Support of 4 existing applications of the engineering department of the Vodafone Greece during office hours.

After the global IT outsourcing deal between Vodafone and IBM I have moved to the latter

Technologies

ASP.NET (VB.NET), Oracle PL/SQL and UNIX shell script.

Sep 2005 until Jan 2007 - ITS S.A, Thessaloniki - Greece

Application Developer

.NET Software developer involved in the design and implementation of both of the company's flagship products, which have been very successful in the retail SME market.

Technologies

.NET WinForms (C#), SQL Server. More specifically .NET and SQL Server Compact were used for mobile application

Jan 2004 until Sep 2004 - IQS S.A, Thessaloniki - Greece

Application Developer

As a Java developer I worked in the windows application edition of EUtrek.com, an advanced stock exchange analysis and monitoring tool

Technologies

Java 1.4.2 SE, Oracle 8 PL/SQL, Oracle 8 PSP

Education

Sep 2004 until Sep 2005 - University of Surrey, United Kingdom

MSc Communication Networks & Software (1-year program)

Dissertation: "Distributed Application for Smart Phones"

Brief Description: Implementation of a two players mobile game by using Java 2 ME

Sep 1997 until Mar 2002 - University of Piraeus, Greece

BSc in Informatics (4-years program)

Diploma Thesis: "Radiosity based 3D Engine"

Brief Description: Development of 3D Graphics Rendering Engine by using Java 2 Standard Edition and Java 3D API.

Additional Information

Languages	• English (Cambridge First Certificate, TOEFL) • Greek (mother language)
Other	Cofounder of Thessaloniki Toastmasters club, which is part of Toastmasters International, a non-profit educational organization that teaches public speaking and leadership skills. I was served as club officer in different roles, such as President and Vice President of Education. I received Competent Leader award on June 2016.
